

Mobile Homepage Annotations

Mobile Screen View & Functional Specifications

iPix & Magnum Vint
Developer Test

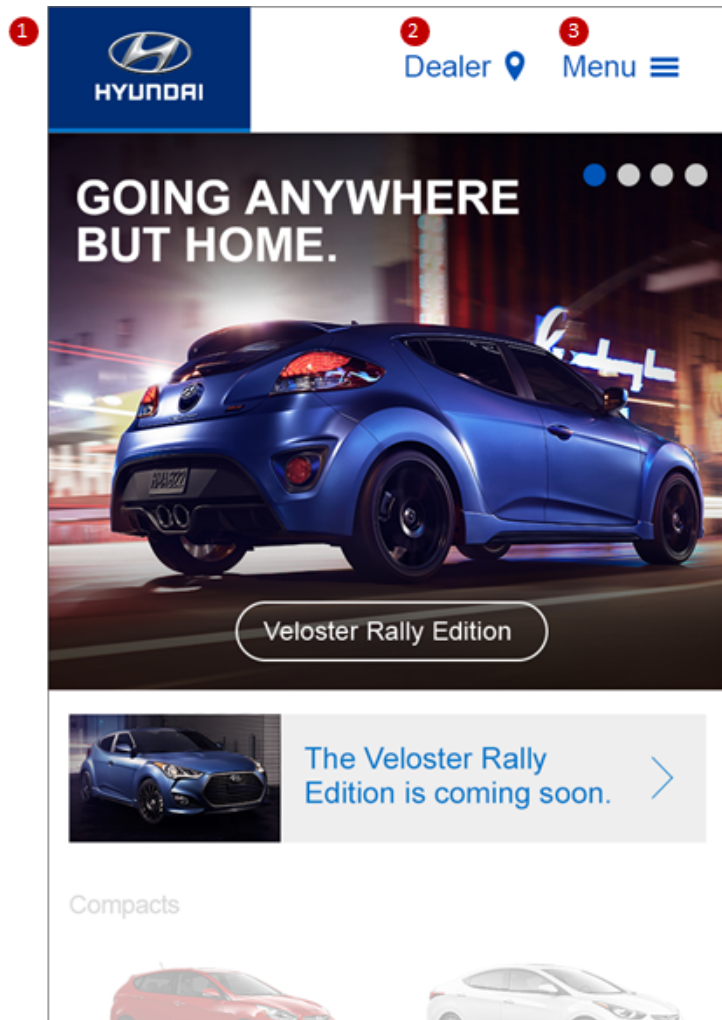

Functional Specifications & Notes

- Required Mobile Device and Browser Compatibility
 - iPhone 5, 6 and 6 plus – Safari (Latest version)
 - Samsung Galaxy S5, S6 – Stock Browser and Chrome (Latest version)
 - Samsung Galaxy Note 5, 6 – Stock Brower and Chrome (Latest version)
- The other comp is a landscape device orientation, which should also fit all of the content 100% except the hero image, and be compatible with any mobile devices resolution.
- PSD to image online converting sites always produce inconsistent results.

For open PSD file

For those who do not have Adobe Photoshop to extract PSD files, please go to the link below to download a free trial version from the Adobe website (<https://creative.adobe.com/products/download/photoshop>).

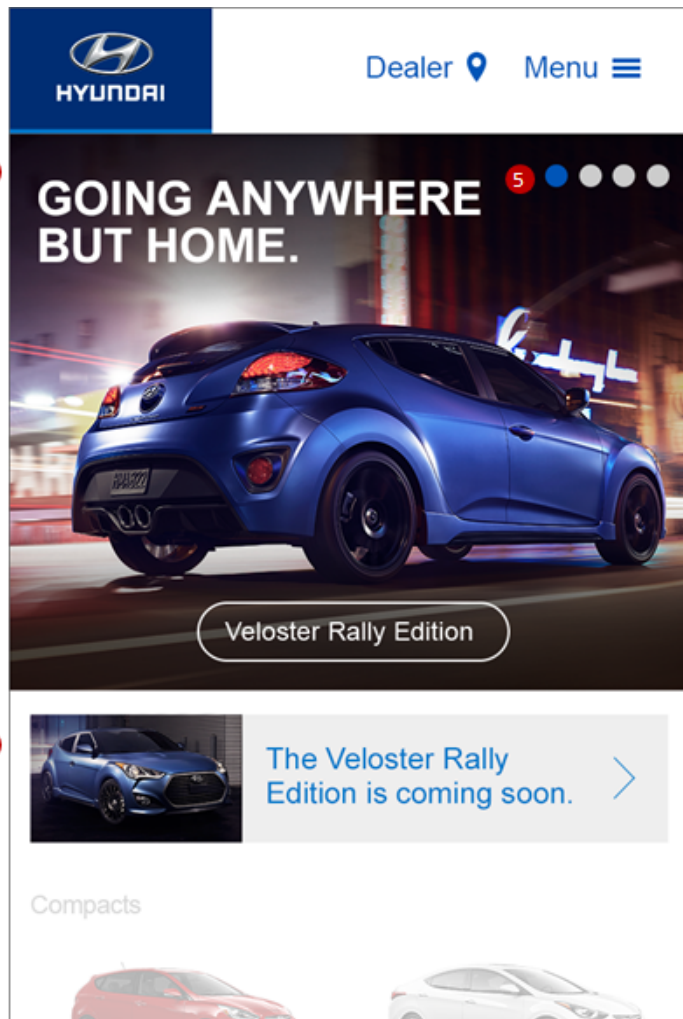

Functional Specifications & Notes

- 1 Goes to the site root ("/") when clicked.
- 2 Goes to Find a Dealer ("/find-a-dealer") when clicked.
- 3 Add a drop-down menu with a slide down animation.
 - You can view the drop-down menu within the "layer Comps"(in "Window" drop down menu) in the PSD file.
 - You can use any JavaScript framework, library or plug-ins.
 - URLs should be lower case, have spaces replaced with dashes ("-"), and be consistent with the text.

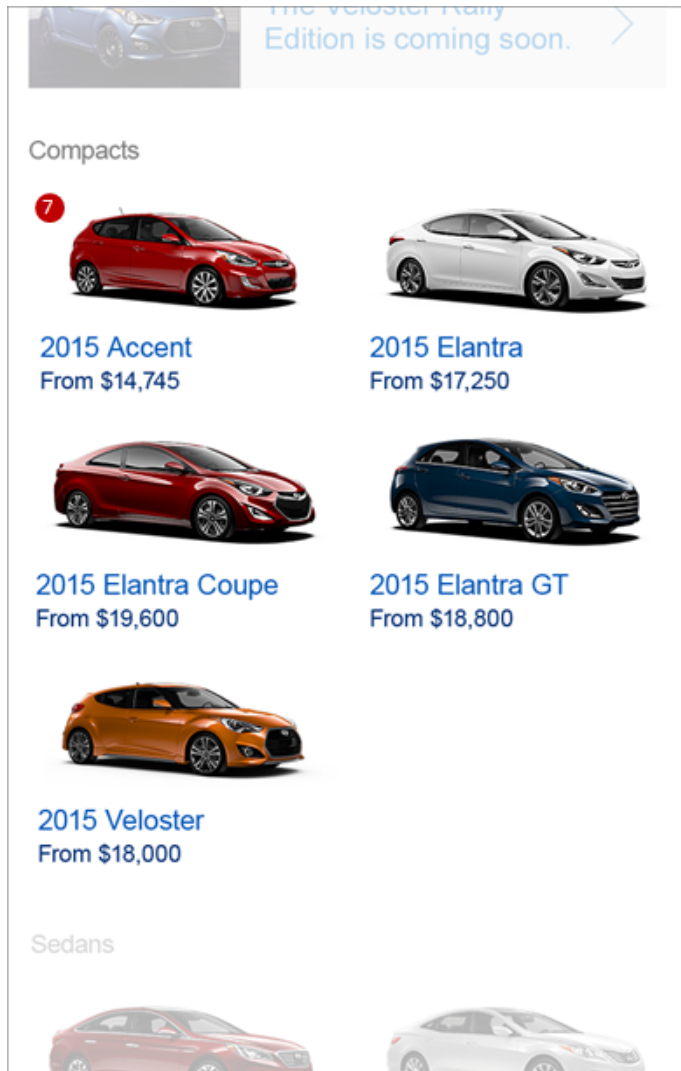

Examples:

- Search Inventory: /search-inventory
- Build & Price: /build-and-price
- Find a Dealer: /find-a-dealer

Functional Specifications & Notes

- 4 Hero images must be swipe-able with touch.
 - You can view the hero images within the "layer Comps" in the PSD file.
 - You can use any javascript framework, library or plug-ins.
 - Use the landscape banner image for both portrait and landscape orientation, but do not change the height. Only crop the sides, and center the image.
 - Hero images go to their corresponding vehicle.
 - Image 1: /veloster
 - Image 2: /sonata
 - Image 3: /sonata-hybrid
 - Image 4: /tucson
- 5 Pagination bullets need to update when the hero image is swiped or bullet is clicked with slide animation. Update the hero image accordingly.
 - You can use any javascript framework, library or plug-ins.
- 6 Goes to Veloster ("/veloster") when tout banner is clicked.

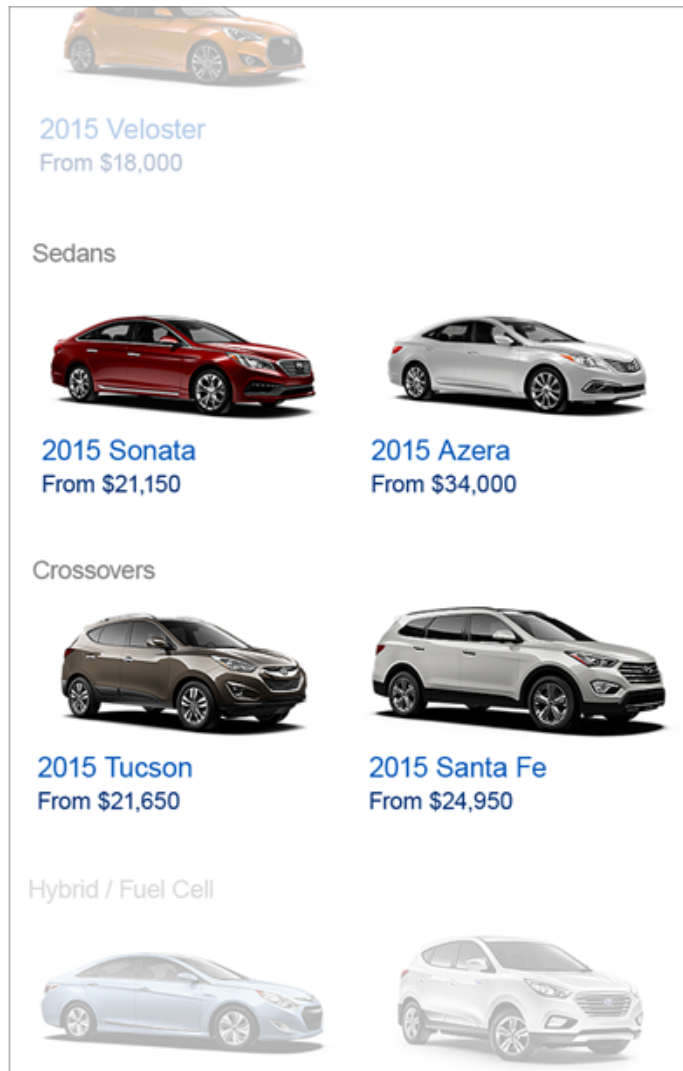

Functional Specifications & Notes

- 7 Goes to the corresponding vehicle when the vehicle image, model name, or price are clicked.
- Use the same style for all vehicles in this section.
- URLs should be lower case, have spaces replaced with dashes ("-"), and be consistent with the text style.

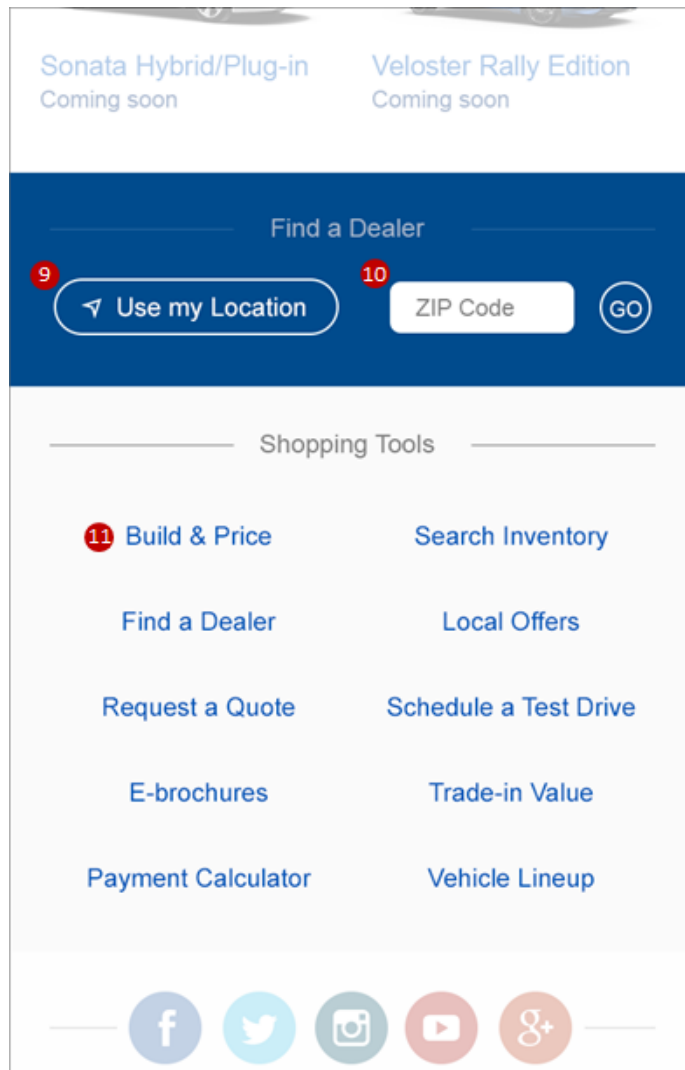

Examples:

- Elantra: /elantra
- Elantra Coupe: /elantra-coupe

Functional Specifications & Notes

- 8 In landscape mode, Show Sedans and Crossovers at one row together as it is in the landscape comps.

Functional Specifications & Notes

- 9 After clicking 'Use my Location', fill the input 'ZIP Code' with the proper zip code based on the users location. Then automatically go to 'Find a Dealer' with the users zip code ('/find-a-dealer/{current zip code}')

Examples:

/find-a-dealer/90001

- Use geolocation module

- 10 Input should accept 5 numbers. No alphabetic or special characters allowed. 'Go' button goes to 'Find a Dealer' with the users zip code input ('/find-a-dealer/{entered zip code}')

Examples:

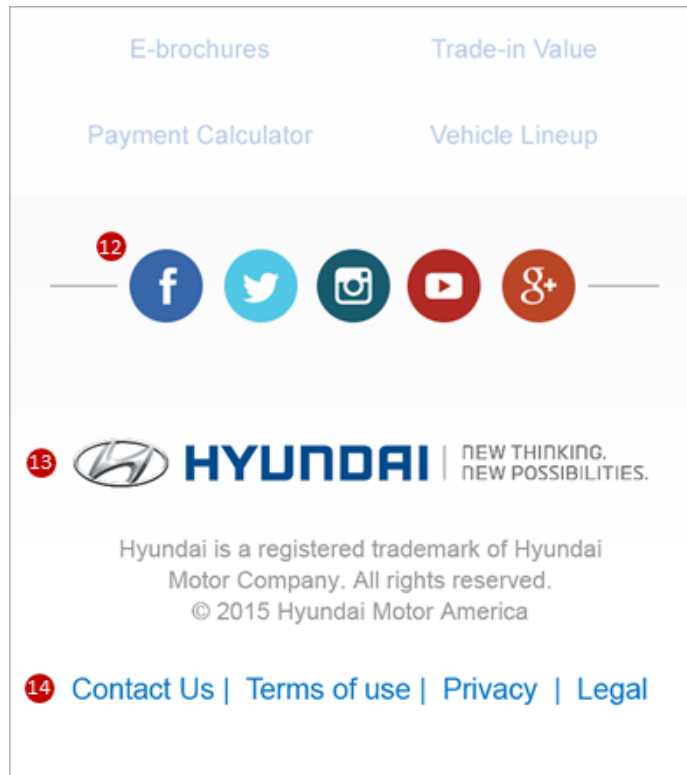

/find-a-dealer/90001

- 11 Goes to Build & Price ("/build-and-price") when clicked.

- URLs should be lower case, have spaces replaced with dashes ("-"), and be consistent with the text style.

Examples:

- Search Inventory: /search-inventory
- Build & Price: /build-and-price
- Find a Dealer: /find-a-dealer

Functional Specifications & Notes

12 Goes to Facebook ("facebook.com/hyundai") when clicked.

- Use a similar style for all the social media URLs

Examples:

- Twitter: twitter.com/hyundai
- Instagram: instagram.com/hyundai
- YouTube: youtube.com/hyundai
- Google+: plus.google.com/hyundai

13 Goes to the site root ("/") when clicked.

14 Goes to Contact Us ("/contact-us") when clicked.

- URLs should be lower case, have spaces replaced with dashes ("-"), and be consistent with the text style.

Examples:

- Terms of use: /terms-of-use
- Privacy: /privacy
- Legal: /legal
